DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 9-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feiring et al (2004/0265738).

Feiring et al disclose fluorinated polymers of structure similar to those instantly claimed. See especially page 4 of the reference wherein at least one of R1-R4 is a H, halogen (preferably F), hydrocarbon of 1-10 carbon atoms, or substituted hydrocarbon with an alkoxy, carbonxylic acid, carboxylic ester group, or $-C(R_f)(R_f)R_b$, wherein Rb is H.

Given the teachings of the reference, one of ordinary skill in the art would have been motivated to prepare a resin comprising a monomer meeting the instant claim limitations.

Allowable Subject Matter

3. The following is a statement of reasons for the indication of allowable subject matter: Claims 2 and 4 are indicated as containing allowable subject matter as the prior art of record fails to teach the instantly claimed process. The prior art teaches a Diels-Alder reaction, which as pointed out by applicant, does not meet the instant claim limitations.

Art Unit: 1752

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Feiring et al ((2004/0180287) is cited for its teachings of similar materials.
